About Me

As a passionate tech enthusiast, I thrive on continuous learning and enthusiastically embrace new technologies. My adaptable mindset and self-driven approach enable me to excel in dynamic work environments. I actively contribute to open-source projects, embodying a commitment to collaborative learning and innovation. Eager to delve into new security technologies and methodologies, I bring a blend of curiosity, dedication, and a strong desire to make meaningful contributions to the ever-evolving tech landscape, with a specific focus on enhancing security and protecting digital assets.

Education

M.Tech Nirma University, Cybersecurity — Aug 2023 – present
- CGPA: 7.69/10

B.E. L. J. Institute of Engineering and Technology, Computer Engineering — Aug 2018 – May 2022
- CGPA: 8.04/10

Experience

Rejig Digital Private Limited, Jr. IoT Engineer — Ahmedabad, Gujarat — Aug 2025 – Present
- Designing and developing RESTful APIs using Nest.js to ensure scalability and performance for IoT applications.
- Managing and optimizing MySQL databases, including schema design and query performance tuning for large IoT datasets.
- Writing Python scripts for automated data insertion and preprocessing, streamlining integration of sensor data into backend systems.
- Leading the integration of Angular-based dashboards with backend services, ensuring responsive design and smooth data flow.
- Utilizing Git for source code management, implementing branching strategies and resolving complex merge conflicts in collaborative projects.

Rejig Digital Private Limited, IoT Intern — Ahmedabad, Gujarat — Aug 2024 – Aug 2025
- Assisted in developing RESTful APIs using Nest.js and contributed to MySQL database management tasks.
- Supported the creation of Angular-based user interfaces, focusing on implementing responsive design elements.
- Collaborated with senior engineers to debug and test system integrations between frontend and backend modules.
- Learned and applied version control best practices with Git, contributing to code reviews and resolving minor conflicts.

7Span Internet Private Limited, Frontend Developer — Ahmedabad, Gujarat — June 2022 – July 2023
- Utilized Tailwind CSS to create visually appealing and responsive web pages that met client requirements.
- Coded using JavaScript(Vue.js) to develop features for both mobile and desktop platforms.
- Worked closely with UX/UI designers to translate their designs into functional web applications.
- Utilized version control systems such as Git to track changes throughout develop-

ment.

- Collaborated with back-end developers to improve website functionality and integrate new features.

7Span Internet Private Limited, Frontend Intern

Ahmedabad, Gujarat
Jan 2022 – April 2022

- Collaborated with the design team to produce visually consistent and cohesive content across platforms.
- Utilized front-end CSS frameworks such as Tailwind for faster development of responsive designs.
- Implemented SEO best practices within website structure, improving search engine rankings for target keywords.

Projects

LinuxAdminToolkit

LinuxAdminToolkit ↗

- This project contains a comprehensive collection of essential Linux commands, networking configurations, services management, monitoring tools, logging practices, and shell scripting examples.

Secure Online Banking System

Internet Banking ↗

- Developed a Secure Online Banking System emphasizing confidentiality, Integrity and Availability of financial data.
- Utilized Nuxt.js, Tailwind CSS, Node.js, and Express.js for a secure, user-friendly interface and efficient backend.
- Implemented robust authentication and authorization mechanism using JWT.

PyCyberSecurity

PyCyberSecurity ↗

- This repository contains a collection of Python scripts and projects related to various cybersecurity tasks.

Skills

Languages: JavaScript, SQL

Tools: Git, VS Code, Linux

Framework & Technologies: Vue.js, Nuxt.js, Angular.js, Node.js, Nest.js, Tailwind CSS.

Technical Competencies: Network Security, Web Application Security, Vulnerability Assessment.

Certificates

Cybersecurity Analyst, The Forage

Apr 2025

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team.
- Helped identify and report security threats such as phishing.
- Analyzed and identified which business areas needed more robust security training and implemented training courses and procedures for those teams.

Cybersecurity Analyst, The Forage

Mar 2025

- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.
- Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.
- Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.

Advent Of Cyber, TryHackMe   Dec 2024
- Completed intensive 24-day cybersecurity challenge covering various security domains
- Gained hands-on experience in digital forensics, web exploitation, and network security

Tools of the trade: Linux and SQL, Coursera   Jan 2024
- Gained proficiency in navigating and managing file systems using Linux Commands in the Bash Shell.
- Developed skills in Graphical User Interfaces (GUI) and Command line interfaces (CLI).

Connect and Protect: Networks and Network Security, Coursera   Jan 2024
- Acquired knowledge about various types of networks and components of networks.

Play it Safe: Manage Security Risk, Coursera   Dec 2023
- Learned about threats, risks and vulnerabilities, and attained knowledge about SIEM tools.

Foundation of Cybersecurity, Coursera   Dec 2023
- Recognized core skills and gained knowledge that is needed to become a cybersecurity analyst.
